

Hydraulic Goods Lift

We are designing and manufacturing excellent quality Goods Lift, which are also called as Hydraulic Goods Lifts. We offer a range of Hydraulic Goods Lifts that includes Single Mast Type and Double Mast Type with the capacity in the range of 300 to 5000 kg. Our Hydraulic Goods Lifts are low priced yet highly efficient and ideal for moving material from ground floor to first floor.

Features:

- Economical in operation.
- Power efficient.
- Does not require lift well / room.
- Failsafe with manual valve.
- Customized as per need & space.
- Suitable for Internal as well External installation.

Specifications:

- Input Power : single phase/3 phase variants available
- Variable Settings: Lifting & lowering speeds

Best Safety Protection:

- Overload

- Hose burst
- Maximum limit safety

Types of Hydraulic Goods Lifts:

- **Single Mast** : Suitable for smaller platform size requirements & capacity up to 1200 Kg. Need a wall / structure support for installation
- **Double Mast** : Suitable for larger platform sizes & higher capacities up to 5000 Kg

Applications:

- Movement of material from ground floor to first, second or third floor.

Note: All our products are designed & made as per customer's requirement & approval.
